

The Helping Hand

...by Jagr Farmerie / Savannah McCarty

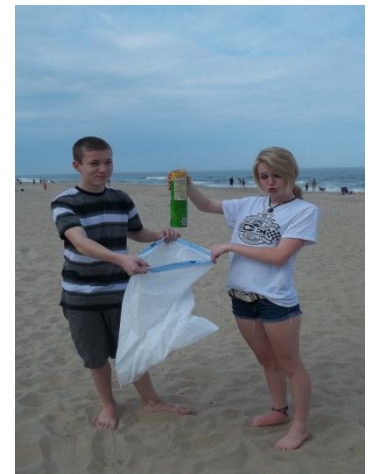

When we went to the beach it hit us! When we went to the beach and skinny dip we realized that a small thing helps out a lot. The beach is a great way of helping picking up the

trash. Skinny dip is the best way of helping to donate money to kellem.

Help cleaning the beach. While we were on the beach we noticed how much garbage was left on the beach. We picked up the garbage and threw it away. We also went around and ask people if they have any trash they have before they leave and forget about their garbage they have. We wanted to help make the beach cleaner.

Going to skinny dip and donate money to kellem. As we arrive at skinny dip we see a lot of people there to help to donate to kellem's cashola too. We buy yogurt to help raise money. We both wanted to help out more so we bought more yogurts to help. If we help we kellem we could make it a better school.

Helping people at the beach and donating money at skinny dip is a big difference than just leaving it the same. When it hit us it changes our lives a lot on how much we can do.
