

My random acts of kindness

Austin Shutter

For my random acts of kindness project I helped my mom clean the house. It took one hour. I did a good thing by helping her. She was happy for me.

I also cleaned my mom's car by taking everything out of her old car and putting it in her new car. It was hard work but it was good weather outside. It only took me ten minutes. There were lots of boxes to move.

The second thing I did was walk the dog I walked around the neighborhood. It was a fun time we walked around it two times. It was very good weather outside. The dog saw another dog and started barking it was getting annoying. That was the only time I walked my dog.

I think I did a good thing by helping my mom she was very proud of me. And I also helped without being asked. I usually don't help people. This project made me help people. It was a good project
